

Finding Texts to Compare in Deep Ways

- * Think about the larger theme of one text, list other texts that address the same theme, and choose a second text that seems to especially "go."
- * Think about how the two texts both address the same theme. How are they similar? "How do they address the theme differently? Why is this significant?"
- * Look at two similar characters from different books and think about how they are similar. Do they both learn similar lessons?
